**IN ADDITION TO THE FUNCTION OF
PREVENTION AND MITIGATION OF RISKS,
WHAT OTHER BENEFITS DOES IT HAVE?**

Natural Infrastructure projects have a positive impact on the environment, **restoring natural habitats and reducing the carbon footprint**, thus contributing to the fight against **climate change**.

REFORESTATION

Reforestation is one of the **natural infrastructure** components, which will cover more than 50 thousand hectares, corresponding to the capture of **more than 500 thousand tons of CO2** per year.

WHAT IMPACT WILL IT HAVE ON LOCAL COMMUNITIES?

Reducing the risk of disasters caused by floods or mass movements.

These projects will generate an estimated 1.3 million labor jobs in natural infrastructure work.

Increased air quality and reduced carbon footprint.

**THESE PROJECTS WILL BE
EXECUTED ALONG 17 RIVER
BASINS IN 7 REGIONS.**
